EXPERIENCE

Language Tools Design Specialist The Church of Jesus Christ of Latter-day Saints	Mar 2024 - Present Provo, Utah
- Function as product owner, Scrum Master, and Developer for internal language tools, leading prioritization and delivery across supervisors, developers, and 2 direct reports supporting ~20 languages. - Redesigned translation workflows across ~75 languages with Dataverse and Power Platform, reducing per-language administrative work ~70-80% while centralizing submissions, progress tracking, and audit history. - Owned the Contributor App and Manager Center, replacing spreadsheet handoffs with direct Dataverse workflows for ~40 contributors and near-immediate operational visibility.	
Co-Founder & Product Lead TeacherAid	Oct 2024 - Apr 2025 Provo, Utah
- Co-founded a 2-person AI EdTech venture; led product design, 5+ educator interviews, sprint planning, and Python/OpenAI MVP development that turned teacher materials into adaptive assessments and targeted review.	
Volunteer Representative / Social Media Leader The Church of Jesus Christ of Latter-day Saints	Nov 2021 - Aug 2023 Switzerland / Germany
- Rebuilt the FindeChristus.org Google Ads strategy around Book of Mormon orders, reducing Google-reported cost per lead ~75% and coordinating a cross-mission website redesign that added support for 3 languages while helping train a ~180-person volunteer organization. - Later redesigned moderator operations with structured Google Sheets tracking and AI-assisted response workflows, increasing digital conversion ~40% in 4 months.	

PROJECTS

Project Beacon Scrum Master / ML Lead / Developer	Apr 2026
- Personally built all 13 predictive pipelines for a 17-table decision-support product while coordinating a 4-person team through a 5-day React/.NET/PostgreSQL delivery.	
Operator Founder / Product Owner / System Architect	Jul 2026 - Present
- Designed an AI product-development control plane coordinating multiple software projects through centralized product context, ticket routing, delegated agent authority, GitHub execution, and telemetry.	
Utah Valley Laptops Founder & Full-Stack Developer	2026 - Present
- Built and operate an end-to-end laptop resale system spanning inspections, inventory, pricing, reservations, listings, and sales operations using Next.js, TypeScript, Node.js, PostgreSQL/Supabase, Vercel, and Render.	

EDUCATION

B.S. Information Systems Brigham Young University - Marriott School of Business	Aug 2024 - Apr 2027 Provo, Utah
- GPA: 3.86/4.00 Richard T. Peery Scholarship Recipient
